Dear Parents/Guardians:

As we approach the back to school date of March 8, Transportation is working hard to get routes set up. We have our work cut out for us as we have to meet Covid-19 guidelines and the bus capacity limitations. We felt we should reach out to the families that use bus services to inform you of the expectations and requirements we are mandated to uphold.

We have created bus routes based off of the online registration that took place in November/December in which parents indicated if they wanted busing services. If you did not pick that option, chances are that your student(s) is not routed.

While at bus stops, please remind your students to practice social distancing, wear their mask and not to crowd the door when the bus arrives.

Upon boarding the bus from home, driver will provide sanitizer to each student before they take their seat.

All students will have assigned seats. There can only be 1 student per seat.

Masks must be worn at all times on the bus. Please remember to send your child(ren) with a mask every day. We cannot wait for a student to run back to the house to get one.

During this time, additional riders cannot ride home or ride to school with friends. (Unless they both currently ride the same bus on a daily basis).

If your student lives outside their school boundary, transportation is the parent responsibility. In the past we've allowed these students to ride if there was space available. Unfortunately, we are having to route buses in shifts to pick up the students that live in their school boundary.

We realize this will be quite the adventure when we come back however, we're very excited to get the students back to school!

If you have any questions, please don't hesitate to contact transportation at 541-451-8485.

Sincerely,

Maggi Estes, Transportation Director
